Welcome to the Wild Space Gallery at New Walk Museum & Art Gallery.

As you explore the gallery you will find lots of animals to look out for and things to do.
What kind of sound do you think the lion makes?

Look around the displays.
Can you find the lion?
Fact
Grasslands have lots of long grass with just a few trees and not very much rain.

Can you find the largest bird and the tallest animal that lives on land?

What are their names?

What else can you see in the Grassland Zone?
This is an Arctic Fox. Can you find him?
(Clue: he lives in one of the coldest places on earth)

Fact
When the arctic fox curls up to sleep it uses its bushy tail to keep its nose warm.

The fox’s thick fur helps it keep warm. Its white colour helps it to hide in the snow and to stay safe.

Why do you think his fur is white?

Which other large white furry animal can you see?
In the Marine Zone, look up to see a variety of birds that live on coastline cliffs.

How many birds can you see?

Fact
Puffins have beaks which are triangular shaped and colourful.
Can you name any of the birds in the Marine Zone?

Match the names with the clues.

What’s my name?

**Clues**
- I am tall and white with a big beak.
- I have an enormous pink bill.
- I am covered with black feathers.
- I am small with a black head.

**Names**
- Cormorant
- Black-headed gull
- Gannet
- Pelican
Look closely at the shells in the Marine Zone.

What shapes and patterns can you see?

Can you name a large mammal that lives in the sea?

Can you see a photograph of sea creature with an unusual shaped head?

What do you think it is?
Which one do you like the best? Why?

Find an animal in the gallery that is smaller than you and one that is bigger than you.
Go to the Temperate Forest.

Can you find the hedgehog? What do you think it feels like?

Crawl in to the tunnel. Can you find a fox hiding somewhere inside?
If you crawl along the tunnel and pop your head up in the pod, you’ll get close to the Australia King Parrot.

What colour is it?

Go to the Tropical Forest. Lots of different types of animals, birds and plants live here.

Spots or stripes?

Can you see the two big wild cats?

Which is a leopard and which is a tiger?
Look at the tree, what can you see in the trunk and branches?

Where do you think the Blackbird might be hiding?

Can you find him?

Fact
You can tell that this is a boy (a male) Blackbird because he is black. Girl Blackbirds (females) are actually brown!
Out of all the animals and creatures you have seen today, which is your favourite and why?
Congratulations!
You have completed the trail.
