### What Factors Contributed To The Accident?

Select up to six Factors from the grid, relevant to the accident. Factors may be shown in any order, but an indication must be given of whether each Factor is very likely (A) or possible (B). Only include factors which have contributed to the accident. (i.e. do NOT include "Poor road surface" unless it was relevant to the accident)

More than one factor may be related to the same road user, if appropriate

The participant should be identified by the STATS19 vehicle or casualty reference number, preceded by “V” if factor applies to a vehicle, driver/rider or the road environment (eg V002), or “C” for a pedestrian or passenger casualty (eg C001). Enter “U000” if an uninjured pedestrian contributed

Note: These factors reflect the Reporting Officer’s opinion at the time of the accident and are not necessarily the result of extensive investigation
